

Kansas Department of Insurance

Commissioner Vicki Schmidt

MEMORANDUM

Date: October 31, 2025
To: Insurance Companies
From: Kansas Department of Insurance
RE: Kansas Insurance Verification System

Pursuant to K.S.A 40-2,241 – 40-2,250 the Kansas Department of Insurance (KDOI) has the authority to create an online insurance verification system for the verification of evidence of motor vehicle liability insurance.

The KDOI is implementing the Kansas Insurance Verification System (KSIVS) to meet this requirement. KSIVS will provide Kansas state agencies the ability to perform real-time insurance verification and significantly improve the uninsured identification process. KSIVS will utilize the Insurance Industry Committee on Motor Vehicle Administration (IICMVA) standards for insurance company reporting.

KSIVS insurance company reporting requirements are summarized below:

- **Web services:** Insurance companies providing auto liability coverage to one thousand (1,000) or more vehicles registered/rated in Kansas shall make their insurance verification web service available to KSIVS.
 - The web services should follow the specifications and standards of the IICMVA.
 - Insurance companies are not required to make vehicles covered under commercial auto coverage available through this web service; however, it is **highly recommended**.
- **Book of Business:** Insurance companies providing auto liability coverage to vehicles registered/rated in KS shall provide their Book of Business (BOB) data to KSIVS on a **weekly** basis.
 - Insurance companies submitting BOB data to KSIVS must use the secure file transfer protocol (SFTP) process outlined in this Guide. Insurance companies insuring fewer than one thousand (1,000) vehicles in Kansas can either SFTP the BOB file or utilize the KSIVS website for BOB reporting.
 - Reporting of vehicles covered under commercial auto coverage is not mandatory; however, voluntary reporting is **highly recommended**.
 - The Vehicle Identification Numbers (VINs) are not required to be reported for non-vehicle specific policies.

Key dates are listed below:

- **October 31st, 2025** – KSIVS is available to insurance companies for registration, testing, and production integration.
- **December 11th, 2025** – Deadline for insurance companies to register on the KSIVS website (www.KSIVS.com).
- **February 27th, 2026** – Deadline for insurance companies to begin testing. Insurance companies must submit a test BOB file to KSIVS and begin web services testing.
- **April 30th, 2026** – Deadline for insurance companies to move to production with KSIVS, making their production web services available (if applicable) and begin BOB data submissions.

The legacy insurance verification system managed by the Kansas Department of Revenue (KDOR) will be discontinued after the KSIVS system is implemented and successfully integrated with Kansas state systems. KDOR will issue communication informing insurers when the legacy system is discontinued. Until then, insurers should also continue their current reporting to KDOR's legacy insurance reporting system.

An Implementation Guide and any future updates will be posted on the KSIVS website. Go to www.KSIVS.com, click on the [HELP](#) link, and then on [Help for Insurance Companies](#). Insurance companies are responsible for reading and complying with this Guide and reviewing additional information posted on the KSIVS website. If you have any questions, please contact the KSIVS help desk at support@KSIVS.com.
